

## ADVISORS – COINsolidation.

advisor@coinsolidation.org  
[www.coinsolidation.org](http://www.coinsolidation.org) / [www.coinsolidation.io](http://www.coinsolidation.io)

### Role of an advisor

In COINsolidation the route we have planned to have advisers is to have them all over the world, specifically 2 per country. If we comply with this rule, in the coming years we will be adding a total of 388, as we mentioned, it would be to have two in each country, in a total of 194 countries. The advisers will be external, that is, not directly hired by COINsolidation, it is not a formal job, they will be consultancies based on the experience of each advisor.

Desirable skills for a cryptocurrency advisor:

- 1.- Extensive knowledge of the cryptocurrency market.
- 2.- Be proactive, innovative and purposeful.
- 3.- With a level of ethics and honesty in the financial field.
- 4.- Be clear and practical in ads
- 5.- Analytical in the cryptocurrency environment (tokenmetrics)

Desirable activities.

The activities of an advisor are variable, however all are focused on improving the COINsolidation ecosystem. The topics are very diverse and the following or some of them may be considered, other topics may be included:

1. Whitepaper review
2. Token sale structuring
3. Token economics
4. Pre-sale investor introductions
5. Engaging with community for ICO
6. Introductions to other Advisors, Exchanges, Investors, Lawyers, tax-advisors etc
7. Regulatory compliance
8. Legal compliance
9. Smart-contract code review
10. Marketing, PR & Branding tips
11. Public consultancies to the COINsolidation community.

We know that the most important thing about a person is their time that they invest in some referenced activity to improve the COINsolidation ecosystem, so the time of the advisor invested in COINsolidation will be in the times that it is imposed.

An important point is that in our distribution of Tokens, there is an item where it is intended for the "advisors" we have a budget to be applied of 2000,000,000.00 COINsolidation tokens.

How and what conditions must be met in order to release tokens and provide them to the advisor who supports the COINsolidation project.

In COINsolidation we have a strict audit on the release of Tokens, this is public knowledge, so in the case of the release of Tokens for advisors the following rule and / or validation processes will be applied to obtain the following reward ranges in time and form.

You have the following types of bonuses to an advisor.

- 1.- Gratification for growth goals (proposals) measurable in scope and time aimed at improving the community ecosystem of COINsolidation. (Measurable by Q1, Q2, Q3 and Q4)
- 2.- Reward for time invested (verifiable) in the COINsolidation community ecosystem. (Measurable by Q1, Q2, Q3 and Q4)
- 3.- Gratification for solutions of problems in the daily operation of COINsolidation oriented to users. (Measurable by Q1, Q2, Q3 and Q4).
- 4.- Gratification for consulting events organized for the COINsolidation community.

Metric parameters to calculate gratification.

a.- Time invested (TI):

30 minutes = 0.1

31 minutes to an hour = 0.2

1 hour to 2 hours = 0.5

More than 2 hours = 1

b.- Scope of advice (SOA):

Private = 0.5

Post = 1

c.- Type of impact on the COINsolidation (CC) community

Low = 0.1

Medium = 0.5

Height = 1

Formula for gratification:

$(250) * TI + (250) * SOA + (250) * CC = \#Tokens \text{ COINsolidation.}$

Each release of Token (periods of 2 years) the value of the Token purchased with the same period of the previous year will be analyzed and the bonus will be adjusted so that it does not vary in the economic amount USD and the same cost-value relationship of the Token is always kept of gratification in all the years.

It is limited to two bonuses or a maximum of 1,500 tokens per Q. These bonuses will be auditable (reports by each advisor) and will be published in the "ADVISOR" section on GitHub for the transparency of token distribution to the investor community. Bonus payment as of Q42021

Adjustments may be made depending on the conditions of the critical currency market in the bonuses, as well as include other types of audits to have a greater transaction with investors.

In the distribution of tokens for advisers, tokens are also contemplated for events that the advisers carry out and organize and / or lotteries among other supports that the advisers propose for the growth of the COINsolidation community.

Any other activity not contemplated in this document and that the advisor proposes or uses for the growth and improvement of the COINsolidation community will be evaluated at the end of each semester and an additional bonus agreed for time and effort made and invested may be paid.

Without further ado, the COINsolidation team would like to thank those interested in this role for supporting the COINsolidation.org project.

NOTE: Advisors who agree to be in the COINsolidation community give their approval to post the bonuses or bonuses on the COINsolidation audit site for transparency with investors.
